

BONALDO

Coseno, Coseno plus

Designer: Mauro Lipparini

Light in its tubular structural elements, strong in its proportions, Coseno is a multifunctional console: a display surface, dressing table, desk and adjustable mirror. Precisely because of these features, it is an ideal item for furnishing any environment, to be placed either in the entrance hall or the bedroom. The slender frame, available in matt painted metal or in the elegant matt copper

and matt bronze finishes, supports a wooden top: a refined material element that gives warmth, enriches the overall lightness and makes it immune to the passage of time. In the Coseno plus version, the two practical metal drawers, made in the same finish as the base, offer further space for placing books or objects.
